

Forward-Looking Statement Disclaimer

This presentation may contain forward-looking statements under applicable securities laws. All statements other than statements of historical facts are forward-looking statement. Forward-looking statements are based on information available to Jamf at the time they are made and provide Jamf's current expectations and projections about its financial condition, results, plans, objectives, future performance and business. You can identify forward-looking statements by the fact that they do not relate strictly to historical or current facts. Forward-looking statements may include words such as "anticipate", "estimate", "project", "plan", "intend", "believe", "may", "will", "should", "can have", "likely" and other terms of similar meaning in connection with any discussion of timing or nature of future operating or financial performance or other events.

All statements we make about our estimated and projected costs, expenses, cash flows, growth rates and financial results are forward-looking statements. In addition, our plans and objectives for future operations, growth initiatives, product plans and product strategies are forward-looking statements.

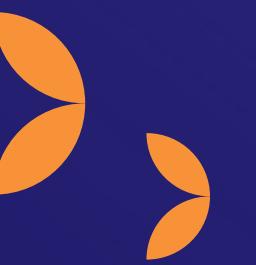

There are various factors, risks and uncertainties that may cause Jamf's actual results to differ materially from those that we expected in any forward-looking statements. These factors and risks are set forth in the documents Jamf files with U.S. Securities and Exchange Commission (SEC). These documents are publicly available on the SEC's website at www.sec.gov or on Jamf's website at ir.jamf.com.

Forward-looking statements are not guarantees of future performance and you should not place undue reliance on them. Jamf is under no obligation to update any forward-looking statements made in this presentation, except as required by law.

Understanding Apple's Deployment Workflows and How to Master them

Managed Apple Accounts

Apple Business/School Manager

The screenshot shows the Apple Business/School Manager web interface at business.apple.com. The left sidebar lists various management categories: Activity, Locations, Users, User Groups, Access Management (selected), Devices, Assignment History, Apps and Books, and Custom Apps. The main content area is titled "Apple Services > iCloud". It features a large "iCloud" icon and a sub-section titled "iCloud" with the sub-instruction "Manage how users in your organisation access iCloud data. [Learn More](#)". A dropdown menu for "Access Management" is open, showing options: Off, Any Device (selected), Managed Devices Only (highlighted in blue), and Supervised Devices Only. Below this, there are toggle switches for "Collaboration", "iCloud Drive" (on), "Passwords and Keychain" (on), and "Access iCloud Data on the Web" (on). A section titled "Apps using iCloud" lists "Photos" and "Messages in iCloud", both with their toggle switches turned on.

Jamf Setup Manager

github.com/Jamf-Concepts/Setup-Manager

The screenshot shows the GitHub repository page for 'Setup-Manager' under the 'Jamf-Concepts' organization. The repository is public and has 8 issues, 5 forks, and 81 stars. The README file is displayed, featuring a cartoon character wearing a suit and tie, and the text "Setup Manager". The repository is described as an "Enrollment progress manager" and includes tags for mac, deployment, enrollment, macadmin, jamf, jamf-pro, and jamf-school. The repository has 15 watchers, 5 forks, and 81 stars. It also includes links to Readme, View license, Activity, Custom properties, 81 stars, 15 watching, 5 forks, and Report repository. The Releases section shows v1.0 as the latest version, released on Jul 1. The footer of the GitHub page includes a link to the discussions area and a note about generic feedback.

Apple Platform Deployment

support.apple.com/guide/deployment/depdc4ba8d82/web

The screenshot shows a web browser window for support.apple.com. The title bar includes the Apple logo, Personal dropdown, and navigation icons. The address bar shows the URL. The main content area has a header "Apple Platform Deployment" with a search bar below it. A "Table of Contents" link is visible. The main article discusses "Service access with Managed Apple IDs", noting requirements for iOS 17, iPadOS 17, macOS 14, or visionOS 1.1. It also mentions that not all services are available worldwide. Below this, a section on "iCloud services availability" is shown, explaining how to manage access through Apple School Manager, Apple Business Manager, and Apple Business Essentials. A note states that available services are listed in a table below.

Table of Contents

Service access with Managed Apple IDs

The following services are available to a Managed Apple ID. Some require a device to use iOS 17, iPadOS 17, macOS 14 or visionOS 1.1, or later.

Note: Not all these services are available in all countries or regions.

iCloud services availability

If permitted, iCloud data can be accessed on devices and by signing in to [iCloud.com](#). To modify access requirements and configure which services are available to users, see the following:

- Customise user access to certain apps and services using [Apple School Manager](#)
- Customise user access to certain apps and services using [Apple Business Manager](#)
- Customise user access to certain apps and services using [Apple Business Essentials](#)

The available iCloud services are shown in the table below.

Deployment and Management Tutorials

it-training.apple.com/tutorials/apt-deployment

The screenshot shows a web browser window for it-training.apple.com. The page title is "Deployment and Management Tutorials". The main heading on the page is "Learn How to Deploy and Manage Apple Devices". Below the heading, a subtext reads "Explore articles and follow guided exercises to gain the skills, tools, and knowledge you need to configure, deploy, and manage Apple devices." A timer indicates "11hr 45min Estimated Time". A blue "Get started" button is visible. At the bottom, there are images of various Apple devices (Mac, iPad, iPhone) displaying deployment-related interfaces like "Add this Mac to Your Organization" and "Remote Management".
